

Automatic rotary monoblock filling and capping machine

Automatic rotary monoblock filling and capping packaging machine, for plastic bottles, ideal for liquid products such as food (lemon juice, vinegar), alcohol, chlorine, aqua forte, etc. The special feature of this type of machine, is that the bottles are suspended in all phases of the packaging. This requires a suitable notch for the suspension of the bottle. The capping system of the machine is suitable for screwed or pressed plastic caps. The machine is made of stainless steel for food packaging or PVC and INOX 316. The machine has an automatic system of cap feeding on the bottles.

It can be combined with an automatic labelling machine.

Technical Specifications

Voltage: 220V, 380V

Filling range: 50-1000ml

Filling accuracy: +-2%

Productivity: +-2000 bottles/hour

Power: 1,5kW

Dimensions:
1200*1200*2300mm
