

AUTOMATIC METAL DETECTOR

Automatic metal detector, with 2m conveyor belt of adjustable speed. Ideal for the detection of products such as, food, medicine, chemicals and various other industries and handicrafts. It is used to detect any metal parts in the product. In case of metal body detection, a warning sound (buzzer) sounds and the conveyor belt stops working. The container with the metal part detected, is removed manually. The structure of the machine is made of stainless steel. Easy to clean and maintain.

It can be integrated to an automatic packaging line.
