

SET OF MACHINES FOR FOAMING LIQUID PRODUCTS (SET-L)

The set is suitable for packaging foaming products into bottles. Ideal for products such as, juice, wine, beverages, drinks, perfumes, cleaning products, chemicals. It consists of the following individual machines: **Semi automatic level filling machine with vacuum, for packing into glass bottles.** It is made of stainless steel. Its operation is pneumatic without the need for the use of electricity, suitable for flammable and explosive materials. The adjustment of the required level is quick and easy regardless of the shape and volume of the bottle. **Semi automatic capping machine pneumatic operation, suitable for spray caps.** It has a system for fixing the cap, with a clamp, placing it firmly in the mouth of the bottle. Excellent result in capping quality. The pneumatic operation provides a uniform result. **Semi automatic capping machine for metallic caps of pilferproof PFP, UT type, with or without flow regulator.** The capping head may have 3-4 rollers, which creates the safety screw pass of the cap. It is possible to raise the bottle to the capping head (with a lever), or to lower the capping head.

Technical Specifications

Voltage:
Pneumatic operation

Filling range:
5-5000ml

Filling heads: 2 or 4

Filling accuracy:
≤ 1%

Bottle mouth diameter: 5-35mm

Bottle height:
≤ 250mm

Air pressure:
0.4-0.6MPa

Air consumption:
0.5m³/min

Cap diameter:
13-22mm
